LA BUE'S PANOPTICON. - Those of our citizens

who saw this wouderful pices of art, last even-ing, at Mozart Hall, will go again to night, and take all their friends with them. To those who did not see it last night, we can only say that ron have missed beholding the finest exhibition, by fir, that ever yet visited this State. It is a ierfully life-like piece of un chanism, any one some of which is to be wondered at for years. The lientenant and his steed, upon the desert battle-field, is one of the most thrilling spectacles ever witnessed. The struggles of the dying steed; how it, after many and painful efforts, finally staggers to its feet; how the faithful brute stoops over its wounded and helpless master, and litts bin by his coat collar, also partially to his feet; standing over him and monenfully licking its own wounds and his nntil oddier and steed both lie down and die tagether-the stricken widow looking with zrx-ious love for her lost husband among the orpsee of the fatal field-the storming of Del--the wreck at sea, with the rescue of the passengers—these and a hundred other life-like and wonderful scenes cannot be described; they nust be seen. It is wonderful how naturally these figures move and act. The movements of fleets and semies; the smoke, and fire, and turmoil of a battle-Seld; the storms ocean, and the perils of wreak and rescue-all are reproduced

During the representation of a rain storm, st night, the scene was so natural and perfect that one lady in the audience whispared to her neighbor, "There! It rains, and I've lorgotten to bring my rubbers and umbrella!" Tas exhibition will be repeated this afternoo at So'clock, and again to night.

THEATER.-Jessie Brown, or the Siege of nelshow, upon the bills for to-night, at the thester, is the great success of the season. In all the detail of admirable appointments, scenery, properties, dressing, and evolutions. we question if this celchrated and most specesal drama was ever better placed upon the stage. In the part of Jessie Brown, around which so much interest naturally circles, we conless Miss Sallie St. Clair took us by surprise. Admirable with in a thoroughly scotch woman, nor to witness such variety and force in the randition, as the part imperatively de-mands for a faithful portraiture. It was to the life, the noble-hearted, cheerful, brave, and patriotic girl, ground whose which the play is founded. The applance throughout the piece was almost and children and worn soldiers, all fainting for want of feed, and the heillsh hordes without the frail fort were watching like wolves for dered delicate and sensitive through a wasting fever, she caught the far-oil notes of succoras drone of the happlace-and she rose and wildest applanse we ever heard in a theater broke from the audience, and continued without intermission through the gallant charge and

In the double-team match yesterday there were only two entries, consisting of Bolly Lew-is and Ike Cook, and Miller's Dameel and John Watts. The former were the favorites at the odds of two to one at the start, but the first heat changed the betting to three to one on the latter, and more than one was heard to say, his speaking of the mare, that she was indeed um-sell, as they learned to their sorrow. But t is due to the former team to say that they had never gone together before, whilst the others had. True to the machinelike operations of he track, the horses were called for the

There is strong reason to believe that if the Abolitionist Lincoln should be elected President by the Black Republican party, the peaceful union of the United States is at an end, and henceforth corr country will be the theater of discord and bloody strife. This may yet be prevented. Near as the evil-

A committee of members of the House was appointed, and that committee reported that they had eximited the precedents and had found ont that Congress had the power, and that it was its duty, to protect all kinds of slave property. They then reported a bill regesling the law of the Ferritorial Legislature taxing these necroes, and made it a joualty against any officer who should try to carry out the legislative act, punshing him with flue and imprisonment. HHANDRETH'S PILLS

Are growing more in favor, with the public. It is now concelled they are the best purgative yet put forth from the world of medicine. The time will surely arrive when they will supercede all other purgatives whatever. The ingredients of which they are composed can scarcely be obtained by druggists or the makers of other pills. Dr. Bra symptom has them grown and prepared without regard to the expense. And this care to make a popular pursative is appreciated, as their sales indicate. Other purgatives are dragging a flickering existence. And yet they may have come merit. But libraramin's Pitts are wire and sure—safe, because they operate solely to impore humors. No valuable-fluid is towclade, only effect or wormout material, which, when taken out of the body, leaves it stronger. They are as pleasant as a truly affective modicine cambe. To say that they will not sometimes give pade would not be true, but the pain they give is only because they remove those crude and had humors from the blood which are the occasion of disease. They open nature is a venues, and this cannot always be done pleas HILANDRETH'S PILLS

OFFICE OF LOUISVILLE COURIER, WADNEADAY EVENING, October 24, 1860. The improvement in the Cotton market South, and the lacreased sales of that staple have had an lin proving influence upon the tone of the general marwere universal tightness of the Money market West and South. The Cottou crop is an lumiense one, and the foreign demand increasing, which has much eased the Money market South. Here it continues about as stringent as some side. times about as stringent as ever, with no disposi-tion whatever to speculate fu any leading article of commerce, including Hog and the Hog product, our great staples of trade. The Tobacco crop in Ken-tucky is estimated to fall rather below the usual average, owing to its late growth and the sudden costs of lale that damaged most of the unhoused erop. The old crop on hand, however, is quite about dant, if not fully equal to the demand for consump-

tion at the prevalling good prices. The weather has been of a very mild character this week, with one light frost, and a steady rain baday.
